---

## EDUCATION

---

### CARNEGIE MELLON UNIVERSITY, SCHOOL OF COMPUTER SCIENCE

*Master of Science in Intelligent Information Systems*

Pittsburgh, PA

Dec 2017

- COURSES (Fall 2016): Machine Learning, Search Engines, Language and Statistics

### PES INSTITUTE OF TECHNOLOGY, DEPT. OF COMPUTER SCIENCE

*Bachelor of Engineering in Computer Science*

Bangalore, India

Jun 2015

- GPA: 9.29 / 10
- COURSES: Algorithms, Data Structures, Databases, Data Mining, Natural Language Processing

---

## EXPERIENCE

---

### SENSARA TECHNOLOGIES

*Product Engineer*

Bangalore, India

Aug 2015 - Jul 2016

- Worked on information retrieval from Wikipedia (infobox + content) for actors, crew and titles
- Worked on data warehousing and OLAP with television program and ad data
- TECHNOLOGIES: Python, NLTK, Django, Jinja

### INTUIT INC, INDIA DEVELOPMENT CENTRE

*Co-op Engineering Intern*

Bangalore, India

Jan 2015 - Jun 2015

- Worked on [mint.com](https://www.mint.com) REST APIs as part of Mint Platform team
- TECHNOLOGIES: Java, Python

---

## PROJECTS

---

#### *Question Generation from Dialog Data (Ongoing)*

Carnegie Mellon University, Research Project

- Working on an automatic question generation system from dialog data under Prof. Teruko Mitamura meant for teaching high school kids English
- Using Bolt English discussion forums from UPenn LDC as dataset and applying supervised techniques at named entity recognition and co-referencing and event co-referencing
- Generating questions and answers from co-references and evaluating the questions generated

#### *Driver Fatigue Detection System*

PESIT, Bachelor of Engineering Capstone Project

- Computer Vision based project focused on real-time video processing on face
- Detected yawns and measured eye blink durations and frequencies
- Published in IEEE International Conference on Signal and Image Processing, China 2016
- TECHNOLOGIES: Python, OpenCV

#### *Customer Care Bot for Mobile Phone Sales*

PESIT, Natural Language Processing Course Project

- Machine Learning and Natural Language based text-based customer care bot for mobile phone sales
- Achieved 65% precision and 71% recall using in-house data to train question-answering model using MaxEnt classifiers and Markov models
- Handled spelling mistakes and shorthand (SMS/text) lingo
- TECHNOLOGIES: Python, NLTK, NumPy, SciPy

---

## SKILLS

---

- PROGRAMMING: Python, Java, JavaScript, Android, HTML/CSS, PHP
- TOOLS AND FRAMEWORKS: Weka ML library, Python NLTK, OpenCV, Django, Flask, Jinja

---

## ADDITIONAL INFORMATION

---

- Best Capstone Project (Social Impact), PESIT 2015
- Finalist, SAP Lumira Hackathon, SAP 2014
- Finalist, Ayana 2014, PESIT's annual hackathon
- Won Intuit Android Hackathon, Intuit 2014
- Finalist, IBM The Great Mind Challenge, 2012
